Response to Amendment/Arguments

1. This action is in response to Applicant's amendment/arguments received on 12/28/2009. Based on Applicant's amendment and persuasive arguments art rejection is withdrawn. However there remains the issues of 35 USC 101 and 35 USC 112 first paragraph with respect to the pending claims.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 30-40 and 45 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent¹ and recent Federal Circuit decisions² indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. For

example independent claim 30 should recite after the preamble "using a computer to perform the following steps.

4. Claims 42-44 and 46 are rejected under 35 USC 101 as being non-statutory because independent claim 42 recite an information system comprising a server system. However the body of claim recites the step like a method claim and there is no structure of a system. Furthermore system comprising a server system is vague because system comprising another system.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 30-46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Amended limitation of independent claims 30, 41 and 42 "wherein the correlated images have been processed to be spatially matched spectrally corrected". This limitation is considered new matter.

6. Claims 42-44 are rejected under 35 USC 101 first paragraph as being single means claim. Independent claim 42 recite an information system comprising a server system. However the body of claim recites the step like a method claim and there is no structure of a system.
